DATA SHEET

# CSII 300 - CSII 300-40

## COMPACT STORAGE FOR FMS

Punching | Laser Cutting | Bending

### ADAPTABLE CONCEPT

The CSII is a modular built storage system for FMS applications to cover the range from 30 to 500 pallets.

A single-cell system can easily be expanded to a multi-cell system.

Connections are possible to punching, laser and bending cells.

Easy setup and short installation time at the customer factory.

The flat pallets have four wheels which gives a compact design (no need of space for crane forks between the pallets).

No TLC (Transfer Lift Cart) is required for pallet transfer from the stacker crane to the cell.

### CONFIGURATION EXAMPLES

#### Example 1

CS Storage with three sections (30-40 pallets) only for raw material.

Connection to: Loader

#### Example 2

CS Storage with five sections (50-80 pallets) with pallets for:  
-raw material  
-finished parts  
-skeletons

Connections to:  
Loader and PR UL

#### Example 3

CS Storage with five sections (50-80 pallets) with pallets for:  
-raw material  
-finished parts  
-skeletons

Connections to: Loader, PRUL and Bending Cell
